TABLE 4

LAND USE IN THE BALTIC STATES

TYPE OF LAND	LITHUANIA		LATVIA		ESTONIA	
	Thousands of Acres	*Per-cent*	*Thousands of Acres*	*Per-cent*	*Thousands of Acres*	*Per-cent.*
Arable land	6,667	48.5	5,243	32.2	2,671	23.9
Meadows and pasture land	2,817	20.5	4,094	25.2	4,305	38.5
Forests	2,599	18.9	4,317	26.6	2,315	20.7
All others	1,673	12.1	2,602	16.0	1,885	16.9
TOTAL	13,756 [a]	100.0	16,256 [b]	100.0	11,176 [c]	100.0

[a] 5,567,000 hectares.
[b] 6,579,000 hectares.
[c] 4,523,000 hectares.

To enable the reader to gain a better understanding and judgment of statistics about the Baltic states given elsewhere in this work, some comparative figures are given in Table 5 regarding the territory and population of Lithuania, Latvia, and Estonia.

Lithuania is lacking in natural resources that are necessary to a well-rounded economic life. One of the country's most serious deficiencies is the absence of its own fuel supply. There is no coal in Lithuania. In 1923 Lithuania imported 5,367,100 litas worth of coal and liquid fuel. By 1928 this figure had almost tripled, imports that year amounting to 14,905,700 litas. The only form of domestic fuel is peat, of which there are 162,221 acres (65,650 hectares). The possibilities of peat have not yet been fully explored, but if peat were made to supplant coal, it is estimated that Lithuania would possess fuel reserves for 132 years.[20]
